

GENERAL INDEX TO VOL. VIII.

[NOTE.—Authors' and Debaters' Names in SMALL CAPS; Titles of Papers in *italics*.]

	PAGE
Acid process for sharpening files.....	325
Address of Horatio Allen.....	1
<i>Address, President's seventh annual</i>	676
Air entrained by belting.....	560
ALDEN, G. I., <i>Formula for reciprocating parts of high speed engines</i>	191
" " disc., friction of non-condensing engines.....	106
" " laboratory of mechanical engineering equipment.....	329
" " engineering problems for senior students.....	335
Aldrich's engine tests.....	86
ALLEN, HORATIO, Address of.....	1
Alloys, copper-tin-zinc.....	336
ALMOND, T. R., disc., intrinsic value of special tools.....	267
" " capital's need for high-priced labor.....	287
" " smoke in blacksmith shops.....	697
Alternating stresses.....	163
<i>Aluminium bronze, casting of</i>	245
Aluminium bronze, corrosion of.....	335
<i>A New Conicograph</i> , Andrew C. Campbell.....	145
<i>A new method of making tubes from solid bars</i> , G. H. Babcock.....	564
Annealing furnaces for castings.....	296
Anthracite, S. S. pressures in.....	475
ARNOLD, BISHOP, memorial of.....	727
ASHWORTH, D., disc., different kinds of belting.....	554
" " power for machine tools.....	312
" " a problem in profit sharing and the labor question....	659
Axles of steel.....	173
BABCOCK, G. H., <i>On a new method of making tubes from solid bars</i>	564
" " disc., the new calorimeter.....	242
" " drawing paper.....	305
" " power for machine tools.....	309
" " sand blast process.....	326
" " turbine tests.....	416
" " evaporating by exhaust steam.....	424
" " cylinder condensation and the compound engine.....	490
" " steel for boilers.....	498
" " steam and hot water.....	525
" " steam and power costs.....	627
" " working pressure of gear teeth.....	704
BAILEY, JACKSON, memorial of.....	728
BAKER, BENJAMIN, Some notes on the working stress of iron and steel.....	157

	PAGE
Balancing rope sheaves	317
BALDWIN, S. W., presents the J. C. Hoadley apparatus to society	20
BARBER, F. M., disc., coast defense	600
BARNABY, C. W., disc., smoke in blacksmith shop	697
BARNARD, W. T., on technical education	468
BARRUS, GEORGE H., The New Calorimeter	235
“ “ disc., friction of non-condensing engines	103
“ “ “ cylinder condensation and the compound engine	488
BEEHLER, W. H., disc., coast defense	613
Belting, centrifugal force of	557
Belting, comparative value of different kinds of	529
“ manufacture of	555
Belting, flesh and grain side	553, 558
Bessemer's solid fort	611
BILGRAM, HUGO, disc., friction in gearing	78
BIRNIE, ROGERS, JR., disc., coast defense	607
Bismuth for lining cylinders	495
Blow-holes in castings	254
Blue printing, new method of	722
BOND, G. M., disc., standard pipe report	41
“ “ “ working stress of iron	171
“ “ “ steam and hot water	528
“ “ “ tubes from solid bars	568
“ “ “ deep holes in steel	705
“ “ “ calculating machines	708
“ “ “ efficiency of a man at a crank	715
“ “ “ friction in hoisting machinery	716
“ “ “ strains in boiler stays	720
BORDEN, T. J., disc., intrinsic value of special tools	264
“ “ “ capital's need for high-priced labor	289
“ “ “ a problem in profit sharing and the labor question	661
Boyden's turbine tests	364, 390
Brass tube, standards for	348
Bridges, safety of	158
Bridges, standard sizes for	683
Briggs' standard	38
Buel, R. H., reports trials of S. S. anthracite	478
Built-up guns	597, 611
Calculating machines	707
Calorimeter, The New	235
Calorimeters, comparison of	243
CAMPBELL, ANDREW C., a new conicograph	145
“ “ disc., drawing paper	307
Canvas belt, tests of	542, 544, 548
Capital's need for high priced labor, W. E. Partridge	269
Carbon in steel	477, 497
Casing for oil wells	348
Casting aluminium bronze and other strong metals, Thomas D. West	245
Cast metal for guns	592

	PAGE
Cellulose armor for ships.....	613
Centennial tests of turbines.....	368, 370, 417
Center of Oscillation.....	215
Chains, limit of stress in.....	710
Charges for power.....	621
Clamond light.....	668
<i>Coast defense, cost and mechanical problems of</i>	582
COLE, J. W., disc., fire boats.....	190
“ “ “ intrinsic value of special tools.....	267
“ “ “ feed apparatus for boilers.....	298
Collins' turbine tests.....	392
Combustion of water gas.....	226
Committee on uniform methods of test, report of.....	17, 346
Committee to nominate officers, 1887.....	352
<i>Comparative value of steam and hot water for transmitting heat and power,</i> C. E. Emery.....	512
Compound engine, development of.....	472
Compound engine to reduce cylinder condensation.....	479
Compounding non-condensing engines.....	486
Compressed air for transmitting power.....	570
Compression in high speed engine.....	202
Condensing engine, friction in.....	108
Conductivity of cast iron.....	493
“ “ metals.....	495
<i>Conicograph, A New</i> , A. C. Campbell.....	145
Contract systems in repair shops.....	653
Contract work in shops.....	290
Contraction and expansion of drawing paper.....	301
Contraction of chilled castings.....	253
Conway bridge, stresses in.....	180
Cooper, Thomas, platinum lamp.....	671
Co-operation of labor.....	647
Copper-tin-zinc alloys.....	336
Corrosion of aluminium bronze.....	335
Corrugated boiler furnaces.....	498
Cost of aluminium bronze.....	256
Cost of pumping hot water.....	522
<i>Cost of steam and power</i>	617
Cotton-leather belts, tests of.....	549
COUCH, A. B., disc. conicograph.....	155
“ “ “ power for machine tools.....	310
“ “ “ working pressure of gear teeth.....	699
Council, report of, XIVth meeting.....	6
“ “ “ XVth “.....	349
COWLES, WILLIAM, Fire Boats.....	182
CRANE, THOS. S., direct acting steam veneer cutters.....	426
“ “ disc. strength of shafting.....	140
“ “ “ power for machine tools.....	309
“ “ “ flying rope.....	315
“ “ “ engineering problems for senior students.....	330

	PAGE
CRANE, THOS. S., disc. tubes from solid bars.....	568
“ “ “ the needs of our navy.....	577
Crank, efficiency of.....	112
Cross-ruled drawing paper.....	302
Cruisers for the navy.....	579
Cut-off, most economical point of.....	486
<i>Cylinder condensation, reduction of by compound engine.</i>	479
Day, W. A., engine tests.....	92
DENTON, J. E., disc. steam and power costs.....	626
Designing, intuition in.....	458
<i>Determination of costs of steam and power.</i>	617
DINGEE, W. W., disc. working pressure of gear teeth.....	702
<i>Direct acting steam veneer cutters</i> , Thos. S. Crane.....	426
Dixwell experiments.....	489
DOANE, W. H., disc. standard pipe report.....	44
“ “ “ power for machine tools.....	311
“ “ “ sand-blast process.....	326
“ “ “ a problem in profit sharing.....	647
DODGE, J. M., disc. casting of aluminium bronze.....	251
“ “ “ annealing furnaces for castings.....	296
“ “ “ grinding-room grit.....	299
Draft tubes and diffusers for turbines.....	374
Drawing in schools.....	694
Drawing-paper, contraction and expansion of.....	301
DREDGE, JAMES, gas lighting by incandescence.....	663
Dredges, performance of.....	122
“ types of.....	123
Dredging machinery, recent improvements in.....	114
Drilling, power for.....	310
Drying of paper pulp by hot water.....	528
Ductility decreased by strain.....	174
Ductility of gun metal.....	591
DURFEE, W. F., disc. flying rope.....	322
DUTTON, C. S., disc. chains for cranes.....	710
“ “ “ different kinds of belting.....	551
Dynamometer, Webber's.....	532
Eccentricity of piston packing rings.....	439
Economy from high pressure.....	483
Economy of pumping apparatus.....	299
Economy of triple expansion engines.....	496
<i>Education of intuition in machine designing</i> , John T. Hawkins.....	458
Education, primary, requirements of.....	688
Efficiency of a man at a crank.....	714
Elastic curves for R. R.....	156
Elevator buckets.....	117
Elevator engines, spur gear for.....	85
Ellipsograph.....	147
EMERSON, B. F., memorial of.....	727

	PAGE
Emerson's flume.....	366
EMERY, A. H., disc. casting of aluminium bronze....	256
“ “ “ annealing furnaces for castings.....	297
“ “ “ drawing paper.....	306
EMERY, C. E., development of compound engine and limit of steam pressure in marine boilers.....	472
“ “ notes for discussion on cylinder condensation, and the reduc- tion of the same by the use of the compound engine.....	479
“ “ the comparative value of steam and hot water for transmitting heat and power.....	512
“ “ disc. turbine tests.....	417
“ “ “ piston packing rings.....	452
“ “ “ different kinds of belting.....	561
“ “ “ a problem in profit sharing, and the labor question..	649, 659
“ “ “ the needs of our navy.....	580
“ “ “ calculating machines.....	709
Etching thin templates.....	296
<i>Evaporating by exhaust steam</i>	421
Expansion per se.....	480
Factor of safety.....	158
Fahnejeim, Otto, magnesia light.....	669
FALKENAU, A., disc. power for machine tools....	313
Fans, power to drive.....	313
FAWCETT, EZRA, disc. piston packing rings.....	449
Feed pumps for boilers.....	298
Files, sharpened by acid process.....	325
Files, sharpened by sand blast.....	324
Fillings for rope sheaves.....	317
Finance committee, report of.....	9
<i>Fire Boats</i> , William Cowles.....	182
Flexibility of bronze.....	251
Floating forts.....	579
Flow in pipes.....	525
Flying rope for transmitting power.....	315
Forging of gun steel.....	593
<i>Formula and tables for reciprocating parts of high-speed engines</i> , G. I. Alden..	191
Formula for belt transmission.....	537
Fortification board, estimates of.....	583
Fortifications, requirements of.....	584
FOWLER, G. L., disc. standard pipe report.....	42
“ “ “ capital's need for high-priced labor.....	285
“ “ “ power for machine tools.....	313
“ “ “ a problem in profit-sharing and the labor question....	653
Fractures of shafting.....	140
Francis' hydraulic experiments.....	364
<i>Friction in toothed gearing</i> , F. Reuleaux.....	45
Friction of condensing engine.....	108
<i>Friction of non-condensing engines</i> , R. H. Thurston.....	86
Fuel consumption report.....	622

	PAGE
<i>Gas lighting by incandescence</i> , James Dredge.....	663
Gas and smoke in blacksmith shops.....	697
Gear teeth, working pressure.....	699
Gearing, friction in.....	45
Geyelin turbine tests.....	416
GIDDINGS, C. M., disc. feed apparatus for boilers.....	298
" " " flying rope.....	316
" " " grinding-room grit.....	299
Girders, strains in.....	159
GOBEILLE, J. L., disc. engineering problems for senior students.....	335
Government specifications.....	159
GRANT, J. J., disc. capital's need for high-priced labor.....	289
" " " intrinsic value of special tools.....	264
Great Western, steam pressure in.....	472
GRIMSHAW, R., disc. coast defense.....	612
" " tubes from solid bars.....	568
Grinding of conic curves.....	155
Grit separation from grinding-rooms.....	299
Grüson's armor tests.....	598
" chilled castings.....	612
Gun steel, forging of.....	593
Gun steel, properties of.....	594
HALSEY, F. A., disc. calculating machines.....	707
HAMILTON, HOMER, memorial of.....	726
Hand training, necessity of.....	691
Haswell, C. H., on early pressures.....	472
HAWKINS, JOHN T., the education of intuition in machine designing.....	458
" " disc. a problem in profit-sharing.....	635
" " " capital's need for high-priced labor.....	276
" " " different kinds of belting.....	559
" " " flying rope.....	315
" " " friction of non-condensing engines.....	109
" " " smoke in blacksmith shops.....	699
" " " strength of shafting.....	140
" " " working stress of iron.....	178
Helical seams in boiler-making.....	357
HENNING, G. C., disc. conicograph.....	155
" " " engineering problems for senior students.....	333
" " " strength of shafting.....	140
" " " working stress of iron.....	174
Hercules turbine tests.....	399
HERMAN, LUDWIG, disc. drawing paper.....	306
" " " thin templets.....	295
HEWITT, WM., disc. a problem in profit-sharing.....	633
" " " tubes from solid bars.....	565
Hides, inequalities of.....	561
High-priced labor, capital's need for.....	269
HILL, C. C., disc. casting of aluminium bronze.....	253
" " " dredging machinery.....	126

	PAGE
HILL, C. C., disc. flying rope	315
" " " strength of shafting	141
Hoadley collection, list of	349
HOADLEY, J. C., memorial of	724
HOBBS, A. C., disc. flying rope	317
" " power for machine tools	309
Hoisting machines, friction in	716
Holes in steel, methods of drilling	704
Holyoke flume	371, 383
Hook gauge	379
Horse power used in United States in 1880.	360
HUTTON, F. R. (L. H. RUTHERFORD), should a piston packing ring be of the same thickness at every point?	439
" " disc. cylinder condensation and the compound engine	499
" " flying rope	321
" " disc. tubes from solid bars	568
Hyperbolograph	152
<i>Incandescence, gas-lighting by</i>	663
Inclined armor for vessels	577
Injectors for boilers	298
<i>Intrinsic value of special tools</i> , Oberlin Smith	258
<i>Intuition in machine-designing</i>	458
Involute gear, failing case of	62
Involute gear, wearing in	63
Iron, working stress of	157
Isherwood's experimental reseatches.	480
<i>Is water-gas an economical fuel?</i> William Kent	225
Jamieson, C. D., on railroad engineering education	469
JENKINS, W. R., disc., oil well sucker rods	295
Kennedy's experiments	163
KENT, WILLIAM, <i>is water-gas an economical fuel?</i>	225
" " disc. alloys of copper-tin-zinc	339
" " " capital's need for high-priced labor	281
" " " conicograph	155
" " " chains for cranes	711
" " " efficiency of a man at a crank	715

" " " strains in boiler stays	719
" " " strength of shafting	139
" " " the needs of our navy	578
" " " tubes from solid bars	568
" " " working stress of iron	171
KERR, W. C., disc., feed apparatus for boilers	298

	PAGE
Labor question, the	723
Labor-saving machines, economy of	681
Laboratory of mechanical engineering equipment	327
LANZA, GAETANO, strength of shafting subjected to both twisting and bending	130
LANZA, GAETANO, disc. engineering problems for senior students	331
" " " equipment of engineering laboratory	327
" " " power for machine tools	309
" " " reciprocating parts of high-speed engine	203
Lay, T. W., designer lake vessels	473
Leather as hygrometer	553
Leather belts, tests of	538
LE VAN, W. B., disc., casting of aluminium bronze	249
" " " conicograph	156
" " " drawing paper	306
" " " feed apparatus for boilers	299
" " " fire boats	190
Lewis, James, platinum lamp	671
LEWIS, WILFRED, disc., friction in gearing	67
" " " power for machine tools	307
" " " reciprocating parts of high-speed engines	214
Library committee, report of	11
<i>Limit of steam pressure in marine boilers</i>	472
Link belt, performance of	552
" " tests of	543
Locomotive coupling-rod	157, 171
Loss in transmitting power	375
Loss sharing	644
MACCORD, A., disc., conicograph	154
Machine design for students	330
Machine tools, power to drive	307
Malleable iron, properties of	251
Manilla ropes	317
Mannesman's tubes	564
Marine engines, pressure in	472
Mechanical engineering laboratory	327
" " problems for senior students	329
Members present, XIVth meeting	2
" " XVth "	343
Memorial notices of members deceased	724
Merrimac, armament of	578
Meter, as unit for screws	686
<i>Method of evaporating by exhaust steam</i> , Albert Stearns	421
<i>Method of making tubes from solid bars</i>	564
Mill power	361
MILLER, ALEX., disc. evaporating by exhaust steam	425
Mitchell's engine tests	86
Mitis metal	252

	PAGE
MORGAN, JOSEPH, JR., our coast defense, its cost and its mechanical problems.....	582
" " " disc. cylinder condensation and the compound engine	496
MORGAN, T. R., SR., disc. casting of aluminium bronze.....	249
Morton's belt formula.....	561
Moulds for steel.....	250
Navies of Europe, organization of.....	602
Navy, what are the needs of our.....	574
New calorimeter, the, George H. Barrus.....	235
NICOLL, WM. L., memorial of.....	728
Nodes in flying rope.....	316
Non-condensing engines, friction of.....	86
Non-conducting linings for steam cylinders.....	499
Note on helical seams in boiler making, R. H. Thurston.....	357
Notes for discussion on cylinder condensation and the reduction of the same by the use of the compound engine, C. E. Emery.....	479
Notes for discussion in relation to the development of the compound engine, and the probable limit of steam pressure in marine engine boilers, C. E. Emery.....	472
Oil well casing.....	348
Oil well sucker-rods.....	295
Our coast defense, its cost and its mechanical problems, Joseph Morgan, Jr....	582
Oxyhydrogen light.....	664
Packing for S. S. Anthracite.....	476
Palmer, J. D., iridium light.....	670
Parabolas for railroad curves.....	155
Parabolograph.....	150
PARTRIDGE, W. E., capital's need for high-priced labor.....	269
" " disc. drawing-paper.....	304
" " " engineering problems for senior students.....	332
" " " flying rope.....	320
" " " grinding-room grit.....	301
Perkins' high pressure system.....	475
Phosphor bronze for wire rope.....	321
Phosphorus in chain iron.....	711
Piece-work in shops.....	285
Piece-work systems.....	644
Pipe-thread standards, report on.....	29, 347
Plunger pumps for boilers.....	298
Pointing rods, machine for.....	566
Popp, Victor, incandescent light.....	670
PORTER, C. T., disc. cylinder condensation and the compound engine.....	483
" " " drawing paper.....	306
" " " piston packing rings.....	449
" " " steam and hot water.....	524
Power to drive machine tools.....	307, 627
President's Address, 1886, Coleman Sellers.....	676

	PAGE
Pressure of steam in marine boilers.....	472
<i>Problem in profit-sharing, A. William Kent.....</i>	630
Proceedings, XIVth meeting, New York, 1886.....	1
" XVth " Washington, 1887.....	341
Profit-sharing, a problem in.....	630
Projectiles, penetration of.....	588
Projection of machine drawings.....	334
Properties of gun steel.....	594
 RAMSAY, H. A., What are the needs of our navy ?.....	 574
Ramsbottom's packing rings.....	449
RANDOLPH, L. S., disc. strains in boiler stays.....	720
Rankine's belt formula.....	561
Rarefied air for fans.....	314
Raw hide belt, tests of.....	546
RAYNAL, A. H., disc. flying rope.....	317
" " " power for machine tools.....	312
Recent improvements in dredging machinery, A. Wells Robinson.....	114
<i>Reciprocating parts of high-speed engines, formule for.....</i>	<i>191</i>
Reckenzaun and Redfield patents for incandescent lighting.....	671
Repeated stress on iron.....	169, 174
Report of committee on standard pipe threads.....	29, 347
Report of committee on U. S. test commission.....	16
Report of council.....	6, 349
Report of finance committee.....	9
Report of library committee.....	11
Report of tellers.....	7, 18, 351

<i>Tests of the comparative value of different kinds of belting</i> , S. Webber	529
Thermal capacity of metals	494
Thermo candle of J. S. Williams	668
THURSTON, R. H., Note on helical seams in boiler-making	357

	PAGE
THURSTON, R. H., on the friction of non-condensing engines.....	86
“ “ systematic testing of turbine water-wheels in the United States.....	359
“ “ disc. alloys of copper-tin-zinc.....	336
“ “ “ efficiency of a man at a crank.....	714
“ “ “ new method of blue printing.....	722
TILDEN, J. A., disc. smoke in blacksmith shops.....	698
<i>Topical discussions</i> , XIVth meeting.....	295
“ “ XVth “.....	697
Torpedo defense, requirements of.....	585
Torsion, apparatus for measuring.....	138
TOWNE, H. R., steam and power; the commercial determination of costs..	617
“ “ disc. annealing furnaces for castings.....	297
“ “ “ a problem in profit-sharing.....	643
“ “ “ calculating machines.....	707
“ “ “ capital's need for high-priced labor.....	289
“ “ “ deep holes in steel.....	704
“ “ “ different kinds of belting.....	552, 560
“ “ “ dredging machinery.....	127
“ “ “ flying rope.....	318
“ “ “ friction of non-condensing engines.....	107
“ “ “ grinding-room grit.....	301
“ “ “ intrinsic value of special tools.....	262
“ “ “ laboratory of mechanical engineering equipment.....	329
“ “ “ power for machine tools.....	314
“ “ “ sand-blast process.....	325
“ “ “ smoke in blacksmith shops.....	698
“ “ “ strength of shafting.....	141
“ “ “ water-gas.....	223
“ “ “ working stress of iron.....	179
Transfer of heat from iron surfaces.....	528
TRAUTWEIN, A. P., disc. water-gas.....	230
Triple alloys, copper-tin-zinc.....	336
Triple expansion engines, economy of.....	496
TRUMP, C. N., disc. sand-blast process.....	324
Tube for oil wells.....	348
<i>Tubes from solid bars</i>	564
<i>Turbine wheel testing</i>	359
UNDERWOOD, F. H., disc. different kinds of belting.....	554, 562
Uniform methods of test, report on.....	17, 346
Vacuum pan, efficiency of.....	425
Vapor as absorbent of heat.....	501
<i>Veneer cutters, direct acting</i>	426
Vibration of flying rope.....	215
Von Welsbach's zirconium light.....	665
WALKER, JOHN, disc. chains for cranes.....	712
“ “ “ efficiency of a man at a crank.....	714

	PAGE
WALKER, JOHN, disc. friction in hoisting machinery	716
" " " strains in boiler stays	720
" " " veneer cutters.....	438
WALWORTH, A. C., disc. intrinsic value of special tools	268
Wastefulness in piece work	646
<i>Water-gas as fuel</i>	225
Water horse power used in United States in 1880	360
Water meter, errors of.....	626
WEBB, J. B., disc. conicograph	156
" " " drawing-paper.....	303
" " " piston packing rings.....	452
" " " sand-blast process.....	325
